

Manage Employee Role Settings

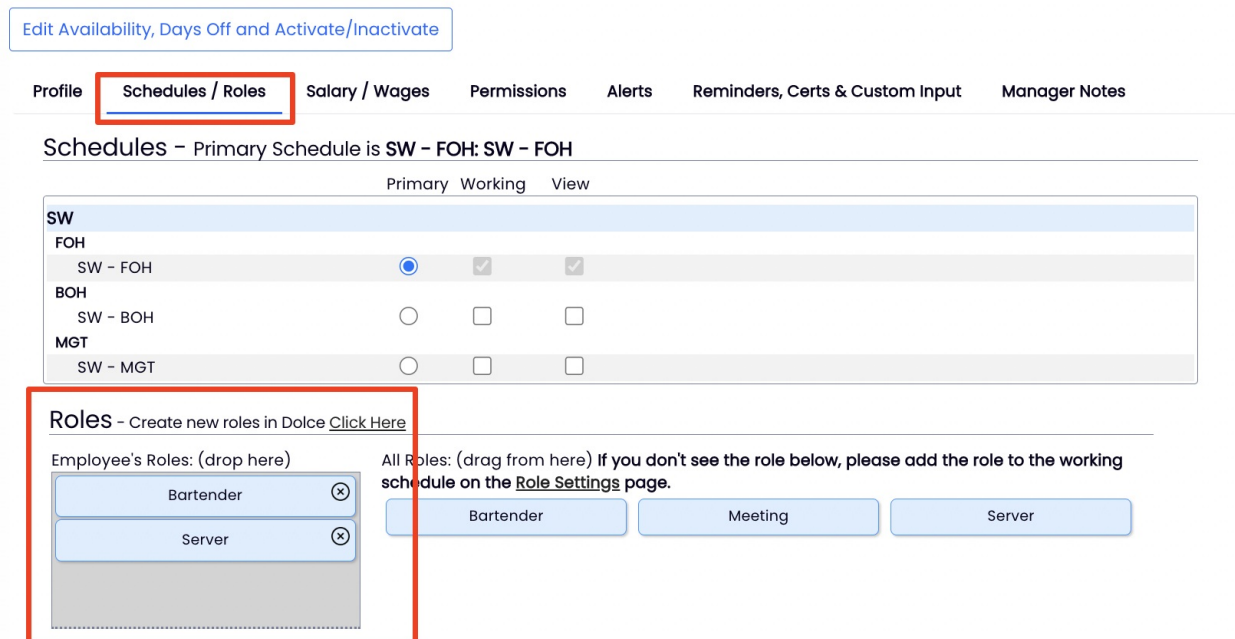

Last Modified on 10/03/2023 3:03 pm MDT

From the Menu Bar, go to **Employees**. Either search for the employee using the search bar in the top right of this page or click on their name from the displayed list of employees.

Select the **Schedules / Roles** tab within the employee's profile. To add a Role, simply drag the Role from the *All Roles* section into the grey box of the *Employee's Roles* section. There is no limit to the number of roles you can assign to an employee.

Edit Profile for Emma Bunton
